## 1. ACKNOWLEDGE

As we understand that the Project is a step by step learning environment that closely simulates the classroom to Lab based on learning environment into actual implementation. This project is based on actual needs to do business, it is suitable for small and medium store.

Furthermore, we can build the project larger in future to be suitable for chain stores system and more experiences for user and their customers.

We would like to send a great thanks to our professor, Mr. Le Thanh Nhan and other students for the adorable support during the time in project.

Besides several mistakes that we had when build in the project, we hope to have more opportunities to widen our knowledge in web developing world.

We also thank you so much for your information and the demo project from India Aptech whom helped us get more reality experiences in this project.

Since we have gained more experience from this project, we will not stop learning anything as much as we can be more successful in the future.

Your sincerely,

Team Group 05.

## 2. SYNOPSIS

This Project will bring to user great experiences when they do business and manage their store with minimum cost. It is an application that users can use to sale and manage their store easily:

- ✓ Customer can find your products and they can order from your website easily.
- ✓ Manager can manage their store easily and fully.
- ✓ Sales man can process order quickly.

Furthermore, we can build the project larger in future to be suitable for chain stores system and more experiences for user and their customers.

We used Laravel and PHP technology to build this project. Through that helps us know clearly what are front-end, back-end or UI/UX from reality requests.

## 3. REVIEW 1

Design Plan: <i>WMS</i>	Document Name: <i>Problem Definition</i>	SWD/Form: <i>No.01/PD/Ver1.0</i>
Effective date: <i>29 Sep, 2021</i>	Version: <i>1.0</i>	Page No: <i>Page 4 of 40</i>

### 3.1 Problem Definition

The Covid-19 pandemic has changed consumer behavior in global, including Vietnam. Based on the actual needs along with the grow development of the programming industry and the widespread popularity of the Internet.

Nowadays user change their buying habits through website and Manager can manage their business anywhere and anytime.

This is a project that is built for Fit-Shoes. With requires building a website that has the following criteria:

1. Customers can easily find products on the website.
2. Provide a function for member register.
3. Provide information of product to customer and member.
4. Provide shopping cart function so customers and members can order products.
5. Member can take their privacy through Member Control Panel.

An Admin Control Panel that support about management system:

1. Administrators can add, update, delete product information quickly and accurately.
2. Administrator can manage employee list and customer list.
3. Administrator can manage delivery progress belong to order.

A Sales Control Panel for sales man that support:

1. Provide List of product to sales man.
2. A Sales man can process order.
3. A Sales man can receipt money and payment management.

#### The role of User/Customer, administrator and sales man

##### 1. User / Customer

- ✓ Can register as a member and manage personal account
- ✓ Can view and buy products
- ✓ Can view their orders.

##### 2. Administrator

- ✓ Can add, edit, deactivate products
- ✓ Can view customer information, employee information and deactivate an account.
- ✓ Can view all orders and approve orders.

## 3.2 Customer Requirements Specifications

### 3.2.1 User / Customer

#### a. Input:

- ✓ Customer registration information/ login/ change password and reset password.
- ✓ View product's information
- ✓ Order selected products /Buy goods
- ✓ View Ordered.

#### b. Process

- ✓ Process customer's registration information/ login/ change password and reset password.
- ✓ Search products from database by Brand, by Categories, by Categories Detail.

#### c. OutPut

- ✓ Notification of successful registration / change password and reset password or failure.
- ✓ Product information.
- ✓ Notification of successful making order.
- ✓ Notification of successful order or failure.

### 3.2.2 Administrator

#### a. Input

- ✓ Administrator login information/ change password and reset password.
- ✓ Product and categories information to add / edit / delete.
- ✓ Customer's information to be search / delete.
- ✓ Employee's information to be add / edit / delete.
- ✓ Order to be search / approved.

#### b. Process

- ✓ Process login / change password and reset password.
- ✓ Process add / edit / delete products.
- ✓ Process view information of all member / delete member.
- ✓ Process add / edit / delete employee.
- ✓ View all orders.

Effective date: <i>29 Sep, 2021</i>	Version: <i>1.0</i>	Page No: <i>Page 7 of 40</i>

- ✓ Update order status

**c. Output**

- ✓ Notification of successful change password and reset password or failure.
- ✓ Notification to add/ edit / delete products success or failure.
- ✓ Notification to edit / delete employee.
- ✓ Notification to delete Customer
- ✓ Notification to update order status.

### 3.2.3 Sales man

**a. Input**

- ✓ Login information / change password and reset password.
- ✓ View product's information
- ✓ Order information to be search / approved.

**b. Process**

- ✓ Process Login information / change password and reset password.
- ✓ Search products from database by Brand, by Categories, by Categories Detail.
- ✓ Process customer ordered.
- ✓ View all orders.
- ✓ Update order status

**c. Output**

- ✓ Notification of successful change password and reset password or failure.
- ✓ Product information.
- ✓ Notification to update order status.

### 3.2.4 Hardware / Software Requirement

No.	Item	Description
1.	Operating system	Window 7,8 or higher
2.	Hardware	CPU core or better with 2G of RAM or better
